

ARBORETUM COLLECTIONS

Prairie Garden typical of plants of short grass prairies. This is what the settlers may have seen in the CO foothills.

Riparian Collection feature CO native trees and shrubs that highlight the drainages and pond.

Heritage Collection are the non-native varieties brought by settlers to CO.

Foothills / Montane are the native species found along the Front Range and mountains.

Orchard highlights the historic importance of Cherry Trees in Loveland. Other orchard species include plums, apples, and pears.

These featured collections signify the predominant landscape types at Mehaffey Park.
