

# Searching for Development Drainage Reports

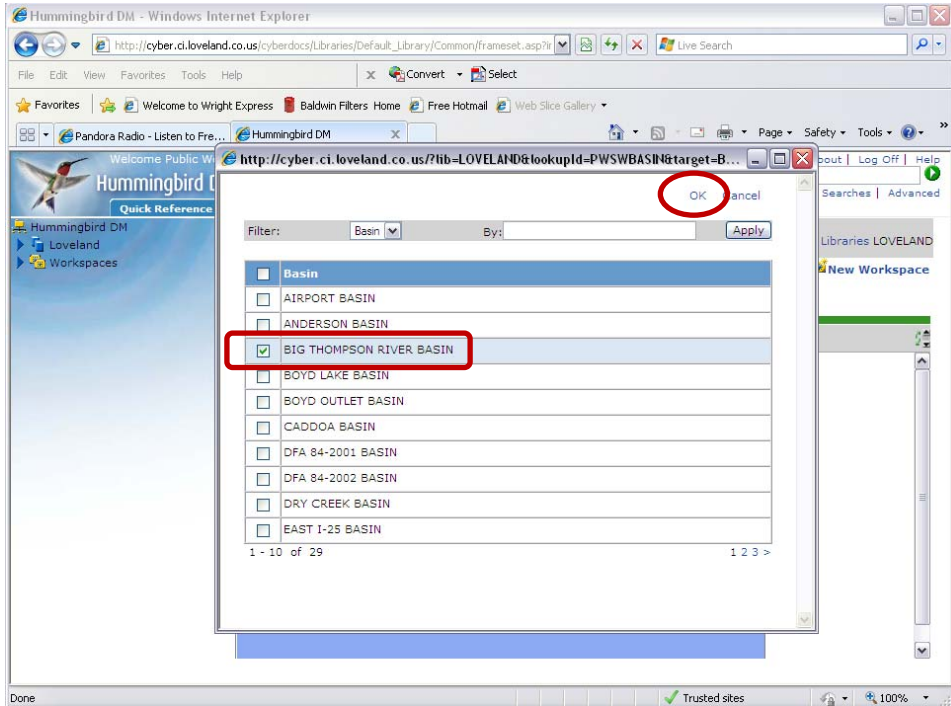

Select the "Drainage Report Search" link

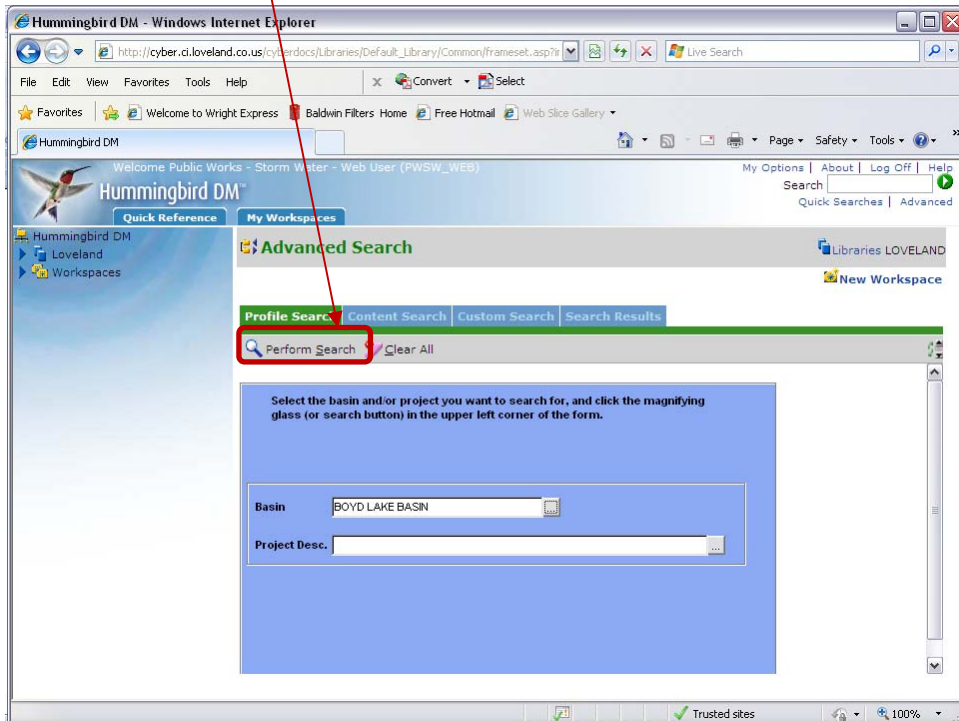

You may search by Basin, Project Description or both. To begin the search, select the ellipsis for the field you want to search. The example that follows will be based on a Basin search.

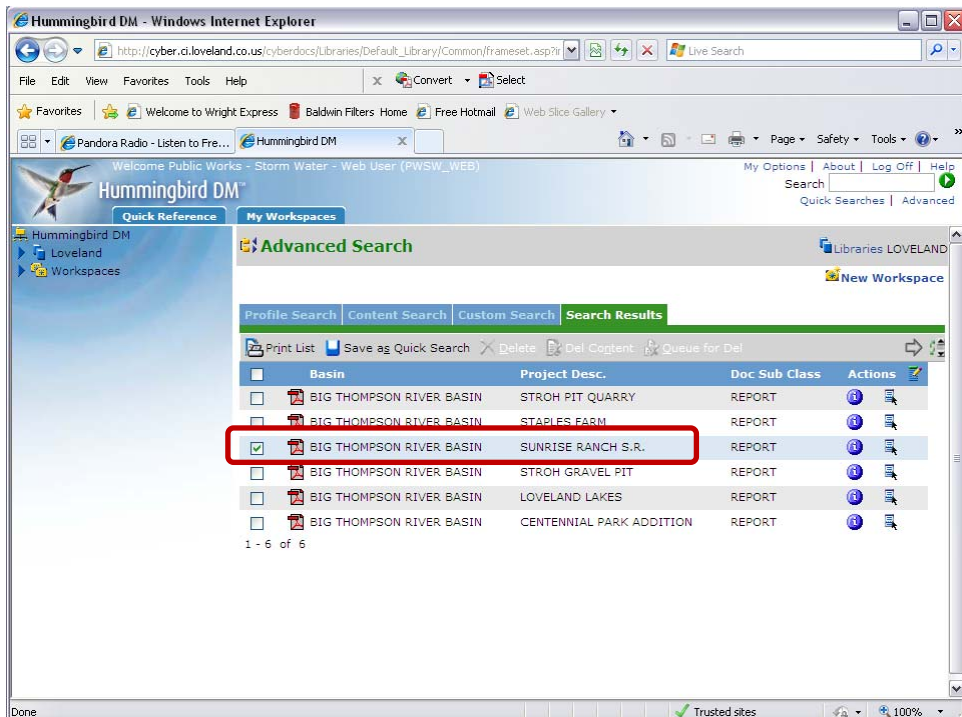

The Basin list will appear. You may select one or more basins to search at one time. Select the basin(s) you wish to search – a check-mark will appear. When you've finished selecting basins, click OK.

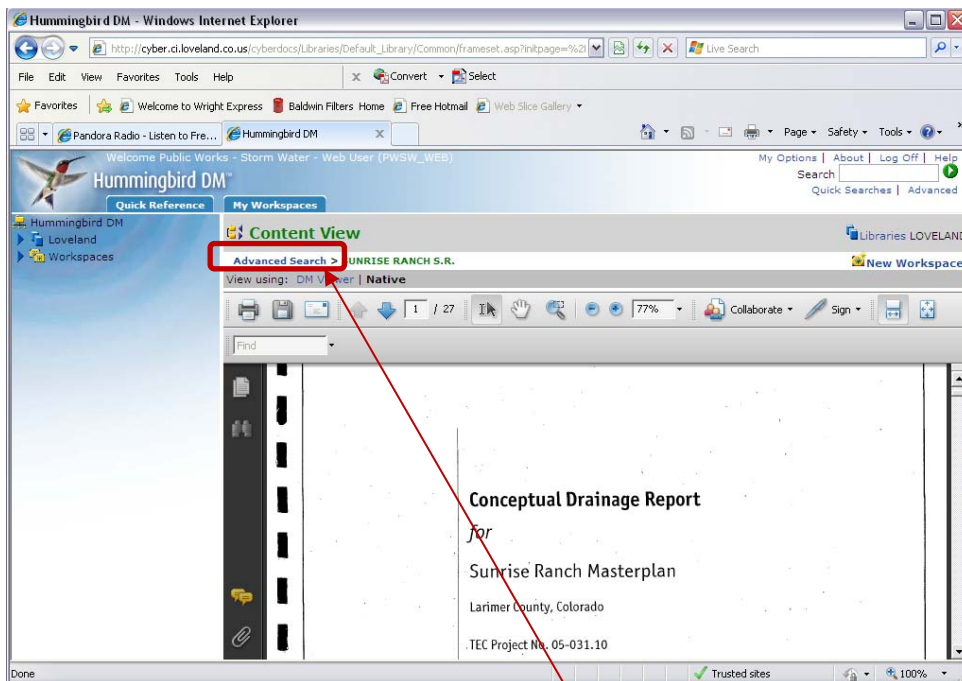

Select Perform Search

Select the report you wish to view. Click on the Acrobat icon and the document will launch.

Once the document opens, you may read, save or print the document.

To return to the previous search window, click on Advanced Search.

Within the initial search window, you have options to search by basin/description – on the Profile Search Tab, by a specific word or phrase on the Content Search tab or create a custom search on the Custom Search Tab.
